

Code Faster and more Accurately

ICD-10-AM/ACHI/ACS Eleventh Edition – Code with Confidence

The new improved TurboCoder Eleventh Edition now features ***Includes/Excludes* notes – in context, EasyView Coding Rules** and enhanced **EIS Multi-User Networking Software Technology** for superior FAST coding confidence.

TurboCoder is an ideal reference tool for training coders in conjunction with the NCCH on-line Eleventh Edition Training Program.

The most cost-effective and practical coding solution for efficient, accurate medical record coding without the exorbitant price.

**TurboCoder Eleventh Edition
now available for desktop**

TurboCoder
with **turb@search**

TurboCoder ICD-10-AM/ACHI/ACS Eleventh Edition is now available for the platform of your choice – Windows and Citrix networks; Windows desktop.

Powerful network technology

Enhanced EIS Multi-User Networking Software Technology – downloads and updates quickly to your PC or network server for instant access and easy updating.

Fast to download and search

Our unique eComPress® and networking technology ensures that searching codes with TurboCoder is faster than other coding reference tools – with guaranteed search results.

Easy-to-use

TurboCoder is the powerful digital version of health classifications in a user-friendly format with a similar look and feel of the books.

TurboCoder Eleventh Edition – New features

TurboCoder Eleventh Edition Windows and Multi-User Network versions have two new powerful features to assist clinical coders in choosing the correct code.

***Includes/Excludes* notes – in context in the Tree Table of Contents**

View all three levels of *Includes* and *Excludes* notes for individual codes without having to scroll back to the top of each chapter, block, category or code title.

EasyView Coding Rules

EasyView allows you view the Coding Rule Title as you roll the cursor over the CR icon, enabling you to determine if the Coding Rule is relevant to the episode being coded.

This is especially useful when there are multiple CR icons applied to a code.

TurboCoder is available by subscription (SaaS)* and operates off-line, and remains web-independent after download and fully functional without an internet connection.

TurboCoder is the foremost trusted ICD-10-AM/ACHI/ACS digital clinical coding tool for health classifications in Australia, New Zealand, Ireland and Saudi Arabia. And endorsed by TAFE/OTEN and HIMAA for educational purposes. With TurboCoder, you're able to find the right code, first time, every time.

**SaaS - Software as a Subscription*

Powerful search enabled through eComPress®

All words, numbers and codes are able to be searched and easily navigated and the classifications are automatically updated whenever new content or errata is available. You will also have instant access to fully hyperlinked Disease and Intervention codes, Coding Standards, Coding Rules and CHADx. TurboCoder's powerful search functionality guarantees you will find what you need, and is enabled by the Award-Winning eComPress® technology developed by Eurofield Information Solutions (EIS).

Powerful Multi-User Networking Software Technology

The TurboCoder proprietary Multi-User Networking Software Technology is designed to be extremely efficient and does not require any additional network servers or other hardware resources and additional network bandwidth. Saving capital investment, real estate, installation etc., and ongoing cost for hardware, OS support, maintenance and power.
